- VIP outgoing message
- Call screening
- Answerphone remote access

Memory Capacity
- Name & number shared phonebook: 255 names and numbers
- SMS storage capacity: 200 SMS
- Call log entries: 80 entries

Product highlights

Handsfree on Handset
The handsfree speaker phone lets you hold a conversation while your hands are busy with something else and wherever you are. With both the speaker and the microphone in front of the handset, it is just like talking face to face with your correspondent.

CS² Crystal Sound System
Philips' unique Crystal Sound System (CS²) audio technology improves the sound quality of Philips DECT phones. CS² audio quality is demonstrably better than competitive DECT products and brings with it distinct benefits.

FAST
FAST= Fast Antennae Selection Technology makes the most of your DECT telephone by improving listening quality. It allows the phone to defend itself against problems such as fading and distortion. Thanks to the small size of the radio, 2 antennae have been placed inside the base. During a call, the optimum antenna is selected automatically depending on the distance of the handset from the base and the environment you are in.

Text messaging (SMS)
The Short Message Service (SMS) is a mechanism for delivery of short messages which can have up to 160 characters of text. These 160 characters are plain text in nature and can be comprised of words, numbers or an alphanumeric combination. The Eatoni®LetterWise predictive text editor helps you to write text messages more quickly. With its unique SMS system you can receive up to 200 messages in 10 different mailboxes. Greeting to a loved one, a quick reminder about an important meeting, …all this can now be put in a SMS and sent over the fixed network.

Eatoni text editor
Eatoni's LetterWise is an easy-to-use text-entry solution requiring just 1.16 taps per correct letter. It makes typing on phone keypads as comfortable, fast, and accurate as using a typewriter keyboard. It is unique among predictive text entry solutions in its ability to easily handle the entry of abbreviations, names, addresses, and URLs.

Personal mail boxes
Children at a certain age need some privacy at home when sending SMS to their friends. But paying for several mobile phones quickly gets very expensive. DECT phones provide up to 9 personal SMS mail boxes which can be protected by a PIN code - SMS can stay private despite collective phone usage. The user must tell his correspondents his mail box number so that they can send short messages directly to this personal mail box. Sending a SMS from a personal mailbox makes it easy for the addressee to reply directly to this mailbox without having to remember the mailbox number.

Backlight on screen
Backlighting is a feature that illuminates the LCD screen or keypad for use in the dark. The two most common types of backlighting include LED and electroluminescent (EL). Remotes backlit with LEDs are typically bright but uneven with a yellow or green color, while EL panels are smooth with blue, white or green shades.

Fast forward and pause
No need to listen to entire messages of 5 minutes before getting the information you want. With the fast forward key you can skip all the bla bla and go directly to the part that interests you. The pause key allows you to stop at a certain point of the message, to write down a number, adress etc.
